

VAIBHAV SHIVDARSHAN GARAD

Full Stack Developer

Ahilyanagar, Maharashtra | vaibhavgarad556@gmail.com | +91 7083491278

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full Stack Developer with hands-on experience across the MERN-adjacent stack (Node.js, Express.js, React.js, MySQL). Built and deployed 3+ full-stack applications, including role-based portals with authentication, REST APIs, and CRUD-driven data systems. Completed a 1-month internship delivering production-style features under real deadlines. Comfortable owning a feature end-to-end, from database schema to responsive UI.

SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap
Backend: Node.js, Express.js, REST API Design, JWT Authentication
Database: MySQL, Database Design & Optimization
Tools: Git, GitHub, Postman, Render, Vercel
Concepts: MVC Architecture, CRUD Operations, Responsive Design, Agile Collaboration

EXPERIENCE

Full Stack Developer Intern

Codveda Technologies, Chandrapur, India (Remote) • Dec 2025 – Jan 2026

- Built and maintained responsive full-stack web applications using Node.js, Express.js, React.js, and MySQL, taking features from database schema through to deployed UI.
- Designed and implemented CRUD REST API endpoints consumed by the React frontend, covering create, read, update, and delete flows for core application data.
- Collaborated in a remote team environment using Git/GitHub for version control, code review, and feature branching.

PROJECTS

Job Portal | HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, MySQL, Nodemailer

- Built a role-based job portal supporting separate employer and job-seeker workflows, including posting, searching, saving, and applying to jobs.
- Designed an automated application-tracking system that moves candidates through hiring stages, reducing manual follow-up for employers.
- Integrated an email notification system to automatically alert candidates on shortlist or rejection status.
- Built a responsive dashboard for employers to manage active job postings and incoming applications in one place.

Hospital Management System | HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, MySQL

- Developed a multi-hospital platform for hospital registration, profile management, and doctor information management.
- Implemented time-slot-based appointment booking with conflict prevention, plus an online consultation flow.
- Built patient-facing search so users can find hospitals, review doctor profiles, and book appointments in a few clicks.
- Exposed REST APIs powering responsive dashboards for hospital admins, doctors, and patients.

Portfolio Website | HTML, CSS, JavaScript, React.js, Bootstrap

- Designed and built a responsive personal portfolio to showcase full-stack projects, skills, and internship experience.
- Implemented project showcase cards linking directly to GitHub repositories and live demos.
- Optimized assets and layout for fast load times and cross-device compatibility.

CERTIFICATIONS

- Full Stack Web Development — A2Z IT Hub
- React.js — Coursera
